OBJECTIVE

Motivated M.Tech student in Information Technology with a strong foundation in software development, Data Structures & Algorithms, and backend technologies. Seeking challenging opportunities in software engineering to leverage expertise in Java, Spring Boot, and REST API development. Committed to contributing innovative solutions and continuously expanding technical skills in a collaborative environment.

EDUCATION

Master of Technology (M.Tech) in Information Technology Delhi Technical University	2025 – Present Delhi, India
Bachelor of Technology (B.Tech) in Computer Science Engineering Gurugram University CGPA: 7.1	2020 – 2024 Haryana, India
Senior Secondary (Class XII) – Central Board of Secondary Education Govt. Boys Sr. Sec. School Percentage: 66%	2018 – 2019 Delhi, India
Secondary (Class X) – Central Board of Secondary Education Govt. Boys Sr. Sec. School Percentage: 85%	2016 – 2017 Delhi, India

TECHNICAL SKILLS

Programming Languages: Java, C, JavaScript
Core Competencies: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Machine Learning
Frameworks & Technologies: Spring Boot, Spring Data JPA, REST APIs, Swagger
Tools & Platforms: Git, GitHub, MySQL, Visual Studio Code, Visual Studio

PROJECTS

Async Image Processing System (Java, Multithreading, ExecutorService) - Engineered an asynchronous image processing system leveraging Java multithreading for concurrent operations - Implemented ExecutorService with optimized thread pools to handle parallel processing of multiple images - Developed image transformation features including resizing, grayscale conversion, and compression algorithms - Achieved significant performance improvement by reducing processing time through asynchronous task execution - Ensured thread safety and efficient resource management using Future and Callable interfaces
Task Management REST API (Spring Boot, MySQL, JPA) - Developed a scalable RESTful backend application using Spring Boot framework - Implemented comprehensive CRUD operations for efficient task management functionality - Integrated MySQL database with Spring Data JPA for seamless data persistence and retrieval

- Architected a clean, maintainable codebase using layered architecture (Controller, Service, Repository) - Created comprehensive API documentation using Swagger for enhanced developer experience

ACHIEVEMENTS

Solved 150+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks platforms

GATE Qualified – Graduate Aptitude Test in Engineering
